ErgoStation®

ADJUSTABLE HEIGHT WORKSTATIONS AND MACHINE BASES

Extol is pleased to offer the finest adjustable height workstations and machine bases in the business. The ErgoStation® design is based on a rugged welded steel tubing frame with integrated AC motor/ball-screw drive system. A solid, robust platform built with safety and reliable function paramount. With the standard 12" vertical working range, lift capacities between 300-3500 lbs and cost effective pricing, ErgoStation® just makes sense.

302 Series ErgoStation

Smaller and lightweight applications are well suited for the 302 series workstations. As with all ErgoStations, we offer a number of popular options and are very capable of custom designs and unique customer requests.

- 300lbs. rated lift capacity (weight centered)
- Hi - Lo fork tube access
- Work surface options include - laminate, butcher block, steel or aluminum
- Custom design and color matching available
- Popular options include: 120V receptacle, compressed air manifold, tool trolley system, overhead light, and operator fan

502 Series ErgoStation

The 502 series is the most versatile and popular ErgoStation we offer. Larger and heavier applications are easily handled with the 502 and this platform also provides additional storage potential or can be implemented as the mounting surface for a large electrical enclosure, commonly mounted on the back of the unit.

- 500 lbs rated lift capacity (weight centered)
- Hi - Lo fork tube access
- Work surface options - laminate, butcher block, steel or aluminum
- Custom designs and color matching available
- Contact us with your unique requirements and for our complete option list

1504/3504 Machine Bases

Heavy-duty, 4-post machine bases are the workhorses of the ErgoStation line. Models 1504 and 3504 can handle the large applications and corresponding machinery while providing the smooth, robust, 12" adjustable height range

- 1,500 lbs rated lift capacity - model 1504
- 3,500 lbs rated lift capacity - model 3504
- Bases are available in a variety of lengths and widths
- Floor hardware - caster wheels or leveling pads
- Hi-Lo fork tube access
- Work surface options - Steel, aluminum or butchers block
- Contact us with your unique requirements and for our complete option list
